

## **NZNO CCDM Educational Videos**

We want to make it easier for you to learn about CCDM and how it works, so we created five educational videos:

1. Overview
2. Patient acuity
3. CCDM FTE Calculation
4. CCDM Core Data Set
5. CCDM variance response management.

These videos provide NZNO members with entry level information about the CCDM programme, its purpose, and why it is important in achieving safe staffing and improving the working conditions of clinical nurses and midwives. You can find them here <https://tinyurl.com/CCDMvideos>

The videos also promote the national CCDM website as a source of more in-depth information regarding CCDM programme tools and processes.

- Each video is between 6 and 10 minutes long
- Watch them separately, or see all five in just under 45 minutes
- Watch these videos on any kind of device, i.e. desktop, laptop, mobile phone, IPAD.

### **See the videos at [www.nzno.org.nz/CCDM](http://www.nzno.org.nz/CCDM)**

For more in-depth information regarding CCDM programme tools and processes visit the national CCDM Programme website at [ccdm.health.nz](http://ccdm.health.nz).

The [Safe Staffing and Healthy Workplaces Unit](#) provides support to DHBs for the implementation of the CCDM Programme, and can be contacted via your local DHB.

If you have further questions please contact NZNO CCDM Project Implementation Coordinator Maree Jones on:
