community and primary care nurses to join
them in this FREE one day seminar.

The Elms Hotel
456 Papanui Road
Christchurch
0900-1630

To register email:
cciostudyday@stgeorges.org.nz

Immunotherapy is an evolving treatment option for people living with cancer. Toxicity from immunotherapy differs to chemotherapy and can appear months to years into or after treatment.

This seminar aims to provide you with an overview of how immunotherapy works, which cancers we use it in and how you might recognize toxicity associated with immunotherapy.
