

# 72nd Annual Scientific Meeting 2021

2 - 4 November 2021  
ONLINE

## REGISTRATION NOW OPEN FOR THE VIRTUAL CONFERENCE

### Introducing the MONTGOMERY SPENCER ORATION AWARDEE

Dr Johan Morreau has been a paediatrician in Rotorua 1984. In July 2018 he retired from clinical practice but remains active in an Advisory capacity and as Deputy Chairman Lakes DHB.

He was in the 1980's the co-author of the Tamariki Ora document forming the background for well child programs and authored the General Paediatric documentation for the "Through the eyes of a child" Ministry of Health project that considered NZ specialist general and community paediatrician needs.

From an RACP perspective Johan was a member of the Written Examination Committee, chaired the original SAC for General Paediatrics NZ, and with Community Paediatrics developed the combined training programme. He co developed the original Starship Update meeting and has had roles which include Chief Medical Officer, NZ Chairman Child Health Division and NZ President RACP. He is Chairman of the NZ Vietnam Health Trust.

"Unfinished" business especially as it relates to achieving Equity and Maori child health will be one of the themes reflected on in the Montgomery Spencer Oration.
