

AGM - Clinical Nurse Educator Network Report

The CENNZ Clinical Nurse Educator (CNE) Network membership is growing with good engagement. Two online meetings in 2025. Various topics covered such as wellbeing, standing orders, sepsis, triage refreshers and HAZMAT procedures. Highlighting the many similarities and differences around the motu.

Network membership has been regularly updated and now open to Clinical Coaches. John Corcoran (Southern DHB) has created a digital space on Pikau for members of the network to create, save and find digital information and resources relating to emergency nursing education. Working on better engagement within this space as technical difficulties regarding access appear to be an ongoing barrier.

CENNZ are looking forward to another opportunity for the CNE network to meet face-to-face alongside the conference in Wellington in March 2026 and providing ongoing support to the network.
