

CENNZ CNE Network Report for 2026 AGM

The CENNZ Clinical Nurse Educator (CNE) Network membership is growing with good engagement. In 2026 we held one face to face meeting in March at CENNZ conference in Auckland and an online hui in July. Various topics covered such as wellbeing, sepsis, triage and resus refreshers, access to CENNZ Triage course, TNCC and ENPC - encouraging home based instructors, also discussed the impact of the national Security Improvement Programme. Highlighting the many similarities and differences around the motu. Network membership has been regularly updated, still trying to encourage clinical coaches to join.

John Corcoran (Southern DHB) has created a digital space on Pikau for members of the network to create, save and find digital information and resources relating to emergency nursing education. Working on better engagement within this space as technical difficulties regarding access appear to be an ongoing barrier. Slow progress as hospitals migrate to Te Whatu Ora/Health NZ accounts.

The Educator Network has been a very solid group responding to and providing feedback on position statements – more specifically the education statement.

We hope to get some engagement and input from the network regarding a national triage refresher.

CENNZ are looking forward to hosting a face to face hui in 2027 and providing ongoing support to the network. The next online hui is planned for the end of Nov.
