

Update your knowledge!

Fundamentals of Endoscope Reprocessing

Program and scheduled dates

2020

What you will learn?

This is a foundation program that serves as an introduction to the reprocessing of flexible endoscopes incorporating infection control, structure and function, water filtration and workplace health and safety. The workshop aims at assisting the complete understanding for staff in the reprocessing of endoscopes and reusable medical devices, infection control and WHS issues. This will be presented by facilitators who are knowledgeable in the field. All information is based on current guidelines and standards relevant to our practices.

Who should attend?

This workshop is aimed at personnel currently involved with the reprocessing of flexible endoscopes and those wanting to keep up to date with current standards and guidelines.
