

**Pacific Nurses Section, NZNO Quarterly news bulletin
Friday 26 August 2022**

Section message

Malo e leilei and Pacific greetings Colleagues

Spring is in the air and hopefully the worst of our cold winter months is behind us now. This newsletter edition coincides with the start of spring and this is an opportune time for us to reflect, refresh and re-orientate ourselves with seasonal changes and the changing health sector priorities.

I acknowledge how busy you have all been throughout our winter period and also with the added pressures of staffing shortages. The last few months has been quite busy too for your committee as we have been involved in some innovative programmes that addresses some of our on-going Pacific nursing issues. We have met with the Nursing council to deliberate on-going support for our Pacific nursing workforce and also with our National Nursing Leadership group supporting the various work streams of our nursing workforce pipeline programme. We have also continued to work with Whitireia to support a Pacific nursing bridging programme for Pacific trained nurses and hopefully the groundwork will be completed in time for a roll out of the programme in the 1st semester of 2023. There are various other pockets of work that is on-going, and we will have an opportunity to update you about this at our upcoming PNS symposium and AGM, which is scheduled for Friday the 7th of October. This will be held at the Pacific Room at MIT in Otago. The Pacific Medical Association has once again sponsored our symposium and AGM and we are grateful for their continued support.

This newsletter edition highlights some of the on-going work and Pacific initiatives that our people have participated in. I thank you all for your continued support of our committee and wish you a blessed spring season.

Malo Aupito

Eseta Finau
Chair PNS

Barriers to older Pacific peoples' participation in the health-care system in Aotearoa New Zealand.

Neville Stephen, Wrapson Wendy, Savila Faasisila, Napier Sara, Paterson Janis, Dewes Ofa, Soon Hoy Neng Wong, Tautolo El-Shadan (2022)

Journal of Primary Health Care 14, 124-129.

<https://doi.org/10.1071/HC21146>

Introduction: Participation in the health-care system is a key component of healthy ageing strategies. The number of Pacific people aged ≥ 65 years in Aotearoa New Zealand will increase significantly over the next decade. Addressing the considerable health inequities and unmet need for care Pacific Island people experience when compared to other ethnicities in Aotearoa New Zealand should be a priority.

Aim: To identify barriers to older Pacific people's participation in the health-care system in Aotearoa New Zealand. [Read more](#)

Understanding barriers to immunisation against vaccine-preventable diseases in Pacific people in New Zealand, Aotearoa: an integrative review.

Tafea Vika, Mowat Rebecca, Cook Catherine (2022)

Journal of Primary Health Care 14, 156-163.

<https://doi.org/10.1071/HC21129>

Introduction: Pacific people have an increased risk of hospitalisation if barriers to immunisation against vaccine-preventable diseases are not reduced. This research sought to determine what is known about the barriers to immunisations in Pacific people living in New Zealand and identify ways to reduce these barriers and inform health care.

Aim: To identify the barriers to immunisation for Pasifika and to identify ways to reduce these barriers and inform health care. [Read more](#)

Intergenerational, integrative and intellectual Pacific properties and pathways for life (IPforLife): a study protocol.

Dewes Ofa, Milne Barry, Sporle Andrew (2022)

Journal of Primary Health Care 14, 173-178.

<https://doi.org/10.1071/HC22004>

Introduction: Chronic disease such as cancer, cardiovascular, diabetes, mental health and obesity have debilitating effects on sufferers with impacts seen increasingly at a younger age. A whole-of-family approach to life-course research is essential to inform health and wellbeing policies and programmes that make a difference for children, youth, adults, and later in life.

Aim: The aim is to present the research protocol about a study to understand the impact of chronic conditions on families, with an emphasis on outcomes that have life-long benefits and co-develop a sustainable and culturally centred life-course programme for overall health and wellbeing. [Read more](#)

Nursing in the Pacific

Health in the Pacific – general

Breastmilk 'saves lives' — so why are fewer working Pasifika women nursing their babies? - NZCity

For generations, Pacific Islander women sat cross-legged on the floor and fed their babies on demand. But breastfeeding rates have fallen over the past 20 years, so why are fewer women nursing their babies? [Read more](#)

Interdependence of health security and health systems highlighted

The impact of Covid-19 in the Pacific has highlighted the inter-dependence of health security and health systems, and the need to improve resilience.

A new report aims to identify and prioritise health system strengthening initiatives in the Pacific. [Read more](#)

Results of a community-based screening programme for chronic kidney disease and associated risk factors, (obesity, diabetes and hypertension) in a Samoan cohort.

Tafuna'i M, Turner R, Matalavea B, et al

BMJ Open 2022;12:e056889. doi: 10.1136/bmjopen-2021-056889

Objectives In 2019, under the World Kidney Day theme of 'Kidney health for everyone everywhere', the National Kidney Foundation of Samoa undertook an extensive community screening campaign to detect the estimated prevalence of chronic kidney disease (CKD) and its associated risk factors in the community.

Conclusions This is the first paper to report the estimated prevalence of CKD in Samoa or any other Pacific Island nation. It reveals an urgent need for further studies on the epidemiology of CKD in Samoa, to develop country-specific prevention strategies to mitigate this growing burden and prevent subsequent CKD associated complications including development of kidney failure and premature death. [Read more](#)

Population-wide active case finding and prevention for tuberculosis and leprosy elimination in Kiribati: the PEARL study protocol

Coleman M, Hill J, Timeon E, et al

BMJ Open 2022;12:e055295. doi: 10.1136/bmjopen-2021-055295

Introduction Population-wide interventions offer a pathway to tuberculosis (TB) and leprosy elimination, but 'real-world' implementation in a high-burden setting using a combined approach has not been demonstrated. This implementation study aims to demonstrate the feasibility and evaluate the effect of population-wide screening, treatment and prevention on TB and leprosy incidence rates, as well as TB transmission. [Read more](#)

Covid-19

Lessons to be learned from Southern Pacific Covid response, leader says

The new Pacific Health director says Pacific providers in the south have shown their strength throughout the Covid-19 pandemic. [Read more](#)

Covid-19: Vaccine protects Māori, Pasifika just as well - study

One of the first studies of its kind has found that Māori and Pasifika, while at higher risk from Covid-19, are reassuringly no less protected by the vaccine than other groups. [Read more](#)

Unfounded assumptions and 'come from behind' wins

Pasifika people have so far been the hardest hit in the latest Covid outbreak (making up around half of all cases). As well, nearly half of all active cases are in Counties Manukau. Last year, Pacific health providers (along with Māori providers) showed what they could achieve when they're given the resources and trusted to make the calls for our communities.

Dr Api Talemaitoga is a GP working in South Auckland and Christchurch, and chair of the Pasifika GP Network. Here, he writes about the lessons learned over the last two years, and how they should inform the response to the current Omicron outbreak. [Read more](#)

Covid-19: How southern Pasifika rallied to care for their own

It started with one positive test that catapulted a family of eight into six weeks of isolation. The Kuresa family, from Invercargill, missed important events like funerals and waved to their friends from the front door as one by one they tested positive for Covid-19. [Read more](#)

Journals, reports and articles

Pacific Health Review

Issue 33

In this issue, we look at an important study exploring the needs of Pacific families affected by age-related cognitive decline.

Other highlights include:

- Variation in vildagliptin use in Waikato patients with type 2 diabetes
- Sugar-sweetened beverage consumption among NZ children

- Universal health coverage in the Pacific Islands

Investing in Our Future: Building Strong and Resilient Health Systems in the Indo-Pacific Region

Linhart, C et al, (2022)

This report presents the findings and recommendations from a rapid desk-based review of the current status of health system strengthening in seven Indo-Pacific countries: Cambodia, Fiji, Indonesia, Lao People's Democratic Republic, Papua New Guinea, Solomon Islands and Vietnam. The framework used to undertake the review was an adapted version of the World Health Organization (WHO) Building Blocks framework, with the incorporation of three cross-cutting key elements: equity in access, quality of care and resource optimisation.
