

YOU'RE INVITED TO A
ZOOM WEBINAR

CARING FOR YOUR STERILE SET-UP

Monday 19 June, 7pm - 8pm

PRESENTER:
DIANE MCCLELLAND

Registered Nurse and Anaesthetic Technician

Diane is presenting this webinar on behalf of the Ruahine-Egmont Region of the Perioperative Nurses College of NZNO.

The Ruahine-Egmont Region covers Palmerston North to Taranaki, and Diane has spent her entire nursing career in the region - training in New Plymouth and working in Palmerston North before returning to her home town of Wanganui to marry and be closer to family.

Infection is one of the most potentially devastating and challenging complications of surgery and invasive procedures, and as nurses we have a responsibility to ensure our actions minimise the potential of this occurring.

This webinar will:

- Help you understand the importance of some procedures and processes required in and around the sterile field.
- Offer revision of back-to-basics practices relating to the sterile procedure trolley in Theatre, Interventional Radiology or the ward.

REGISTRATIONS REQUIRED
