RESEARCH STUDY

We would like to invite you to participate in a study investigating preoperative cognitive assessment of older surgical patients?

Participation involves:

- Completing an anonymous online questionnaire, which will take approximately 10 minutes of your time

AM I ELIGIBLE TO PARTICIPATE?

- Are you a Registered Nurse; Enrolled Nurse; or Nurse Practitioner?
- Are you working in an area where care is provided preoperatively to prepare patients for surgery?
- Are you working in a private healthcare facility?

**ELIGIBLE PARTICIPANTS
CAN WIN A
\$50
PREZZY CARD**

ABOUT OUR STUDY

We are investigating the nurses' role in the preoperative evaluation of older, elective surgical patients. Older age patients are at a greater risk of experiencing post operative neurocognitive disorders, especially if they have pre-existing cognitive impairment. Our study aims to find out what NZ nurses working in private surgical facilities know about preoperative cognitive assessment.

If you are a preoperative nurse who doesn't currently undertake cognitive screening/assessment, we would still like you to participate.

Approved by the Auckland Health Research Ethics Committee on 01/03/2024 for three years. Reference number AH26645.
